To Whom It May Concern:

Enclosed is a list of the computerized literature searches performed by the Toxic Substances Branch during fiscal year 1987 (October 1, 1986 - September 30, 1987). Attached to the list is an alphabetical index of the searches by search title. You might find it helpful to browse the title list for subjects of interest.

Searches marked with an asterisk are those which we felt might be of interest to a number of our clients. If you would like to request a copy of a search with an asterisk, please call Dianne Groh, Monday through Wednesday, at (303) 293-1735. If you have an E-Mail box, have your box number ready so she can send the search to you via E-Mail. If you are not able to receive E-Mail from EPA's system, Dianne will print and mail the search to you.

We will continue to offer no-cost literature searching for state and local government offices throughout FY'88, and hope that you and your staff will use our services often.

If you have any questions or wish to have a search run, please call Dianne Groh. Thank you for your interest.

Sincerely yours,

*C. Alvin Yorke*

## LIST OF SEARCHES RUN DURING FISCAL YEAR '87

## U.S. ENVIRONMENTAL PROTECTION AGENCY, TOXIC SUBSTANCES BRANCH

The following computerized literature searches were run by staff of the Toxic Substances Branch of the EPA Region VIII Office in Denver during the period from October 1, 1986, through September 30, 1987.

Some of the searches have been retained on diskette. These are indicated with an asterisk after the title. Copies of these saved searches may be requested from Dianne Groh at (303) 293-1735, or by sending a request via E-Mail to Box EPA9850, attention: Dianne Groh. You should be cautious about using a search run for someone else, however, since it was not designed to meet your information need. Also, for the more esoteric questions, it is likely that there was not much information available.

New searches on toxicity and environmental fate of chemicals and pesticides can be requested at any time from Dianne.
